1. We are encouraged by the suggestion which is before us to help promote better understanding between Directorates, but we feel somewhat awkward in that our rather unique position in this Agency does not lend itself towards a meaningful participation in such a program. and, as such, all our plans, programs, and problems fall under the special security control of the [redacted] system. Moreover, we do not enjoy the normal Agency support but in most instances look to the specialized and compartmented support provided through the OSA channels.

2. Assuming that the security of our programs would dictate against a revelation of our activities to such an audience, we feel that we would have little to contribute to such an assemblage. Accordingly, our response is that, in view of the above, this Office would have nothing to contribute. However, we would certainly like to retain the option to be on the listening end of any such program.
